## Figures

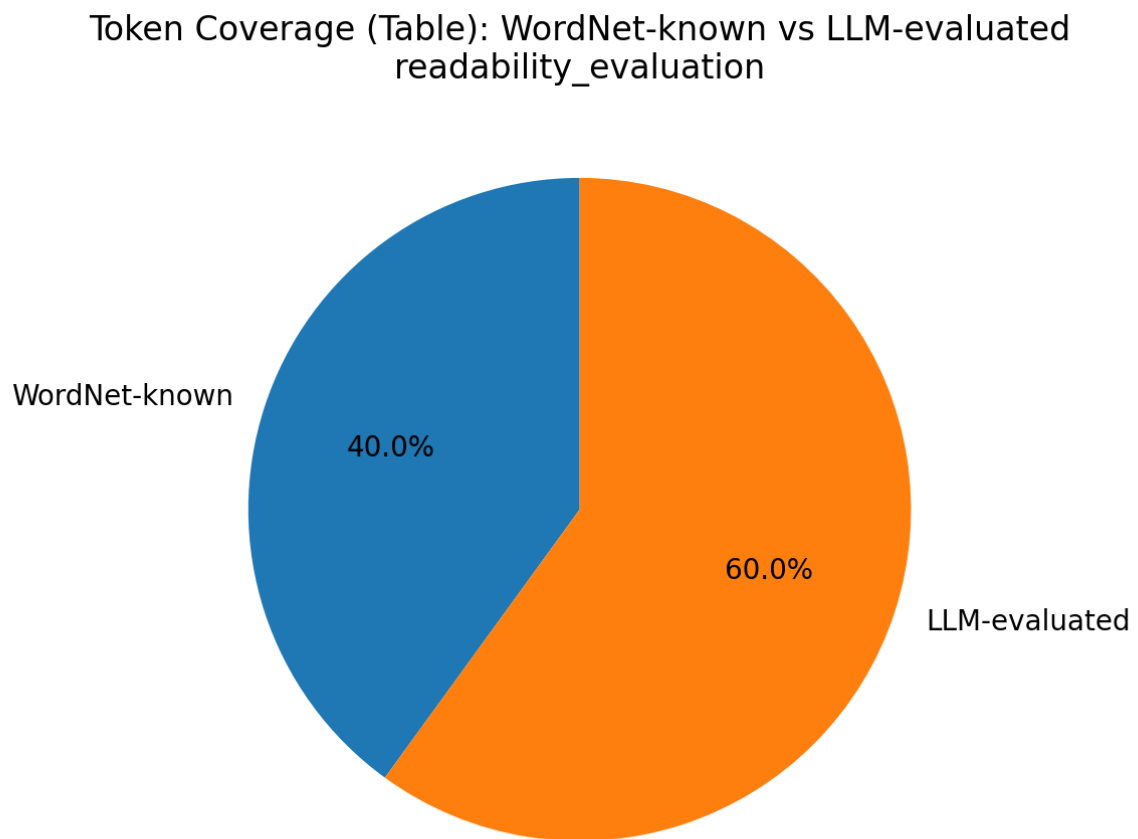

**Figure 1.** Table-Level Content Readability (WordNet vs Hybrid). Shows aggregated table-level content readability and the uplift gained by LLM fallback.

**Figure 2.** Column-Level Content Readability (WordNet vs Hybrid). Bars compare WordNet-only vs Hybrid (WordNet+LLM fallback) per column. Annotated  $\Delta$  values represent uplift (Hybrid – WordNet) per column.

**Figure 3.** Token Coverage at Table Level. Pie chart shows the share of tokens handled by WordNet vs tokens requiring LLM evaluation.

**Figure 4.** Schema vs Content Readability. Compares label readability (schema granularity) against content readability (table granularity).
